journal of
neurosurgical sciences

THE OFFICIAL JOURNAL OF THE ITALIAN SOCIETY OF NEUROSURGERY

INDEX

Vol. 20 - 1976

EDIZIONI MINERVA MEDICA TORINO

SUBJECT INDEX

Anaesthesia

Anaesthesia and intracranial pressure . . 235
Effects of Enflurane on ICP and indications for its use in intracranial surgery 241
The Chusing response as an anaesthesiological problem in neurosurgery . . . 243

Arnold Chiari deformity

Pathology of the neurosurgical processes of the brain stem 55
Radiological study of the surgical lesions of the brain stem 67
Neurosurgical non vascular malformations of the brain stem 93
The brain stem in the malformations of the cervico-occipital bones and articulations 289

Arterial hypertension

Intracranial pressure in the course of intracerebral hematomas in patients suffering from arterial hypertension . . 224

Brain stem

Considerations on clinical "brain stem" semeiology in acute post-traumatic coma 5
Diagnostic criteria for brain stem traumatic lesions 17
The prognosis of brain stem lesions in patients with recent head injuries . . . 33
C.S.F. and blood biochemical changes in brain stem injuries 39
Intensive care of traumatic brain stem injuries 43
Pathology of the neurosurgical processes of the brain stem 55
Radiological study of the surgical lesions of the brain stem 67
Brain stem tumors 85
Neurosurgical, non vascular malformations of the brain stem 93
Surgical vascular pathology of the brain stem 101
Stereotactic surgery of the brain stem . . 109
The brain stem in the malformations of the cervico-occipital bones and articulations 289
The value of the brain stem reflexes in coma 293
Intravascular coagulation in traumatic and non traumatic brain stem affections 299
Brain stem involvement, ventricular fluid pressure, and prognosis in patients with severe brain injuries 305

Cerebral angiography

Primitive trigeminal artery 321
The importance of pre-operative identification of tentorial artery 341

Cerebral haemorrhage

Intracranial pressure in the course of intracerebral hematomas in patients suffering from arterial hypertension . . 224

Cerebrospinal fluid

C.S.F. and blood biochemical changes in brain stem injuries 39

Cerebrospinal fluid shunts

Complications of extracranial shunt operations in adult hydrocephalus 117
Complications of ventriculo-peritoneal shunts in infant hydrocephalus . . . 119
Choroidal and ependymal reactions . . . 123
Septicemias 131
Biological complications 137
Subdural and extradural effusions 139
Radiological skull X-ray alterations in hydrocephalic shunted children . . . 143
Perforation of viscera 149
Complications dependent on surgical technique 157
Incongrous drainage and CSF shunt control methods in operated hydrocephalic patients 161
Clinical application of radioisotope techniques for evaluation of CSF shunts 169

Craniotomy

The subtemporal extradural approach to the pathological lesions of the petrous bone 317

Glioblastoma multiforme

The importance of pre-operative identification of tentorial artery 341

Head injuries

Considerations on clinical "brain stem" semeiology in acute post-traumatic coma 5
Diagnostic criteria for brain stem traumatic lesions 17
The prognosis of brain stem lesions in patients with recent head injuries . . . 33

C.S.F. and blood biochemical changes in brain stem injuries 39
Intensive care of traumatic brain stem injuries 43
Some remarks concerning ventricular fluid pressure monitoring after severe brain injuries 228
The role of acute arterial hypertension after head-injuries: Experimental study in cats 283
Intravascular coagulation in traumatic and non traumatic brain stem affections 299
Brain stem involvement, ventricular fluid pressure, and prognosis in patients with severe brain injuries 305

Hydrocephalus

Pathophysiology of the cerebro-spinal fluid and intracranial pressure 247
Remarks on the clinical significance of intracranial pressure changes in hydrocephalus 259

Intracranial pressure

Physical description of the system . . . 183
Methods for measuring intracranial pressure (I.C.P.) 189
Intracranial pressure-volume relationships in pathologic conditions 203
Experimental models of intracranial pressure 211
Intracranial pressure in the course of intracerebral hematomas in patients suffering from arterial hypertension . . 224
Some remarks concerning ventricular fluid pressure monitoring after severe brain injuries 228
Anaesthesia and intracranial pressure . . 235
Pathophysiology of cerebro-spinal fluid and intracranial pressure 247
Remarks on the clinical significance of intracranial pressure changes in hydrocephalus 259
Recording of intracranial pressure in 2 cases of pseudotumor cerebri 261
Thermographic and electron-microscopic examination of the rat brain in the early phase of intracranial pressure increase 275
Brain stem involvement, ventricular fluid pressure, and prognosis in patients with severe brain injuries 305
Endocranial hypertension syndrome in a case of idiopathic hypoparathyroidism 311

Meningioma

Two stages surgery for a total removal of huge global hypervascularised sphenoidal meningiomas 327

Posterior cranial fossa

The subtemporal extradural approach to the pathological lesions of the petrous bone 317

Pseudotumor cerebri

Recording of intracranial pressure in 2 cases of pseudo-tumor cerebri 261

Radioisotope scanning

Clinical application of radioisotope techniques for evaluation of CSF shunts 169

Stereotaxic technics

Stereotactic surgery of the brain stem . . 109

Subdural effusion

Subdural and extradural effusions 139
Asymptomatic subdural hygroma 333

Thermography

Thermographic and electron-miroscopic examination of the rat brain in the early phase of intracranial pressure increase 275
